

# HMI SOFTWARE

**Failsafe Controls** is proud to be a distributor and servicer of both **InTouch® by Wonderware®** and **Ignition® by Inductive Automation®** Human Machine Interface (HMI) software. As the world's leading HMI software products, InTouch® and Ignition® have unparalleled versatility, from single-node HMI to enterprise-wide supervisory solutions.

### InTouch® by Wonderware®:

- Significantly reduces application development costs
- Includes features, power, and flexibility for more productive and creative engineering
- Builds the most credible, secure, dependable, and sustainable HMI, SCADA, and MES applications

### Ignition® by Inductive Automation®:

- Eliminates the need for tedious software installation with its Web-based software
- Configured via Web browser allowing the software to perform independent of Operating System (Windows, Mac, Lenox, etc.) and covering the full spectrum between HMI, SCADA, and MES
- Unlimited tags, windows, clients and simultaneous users at no additional charge
- Industry-leading support for SQL databases

Along with the world's best automation software, our customers also get the benefits of **Failsafe Controls'** highly trained staff, installation services, full line of inventory, and a 24-hour tech support line for troubleshooting and repair assistance.

The technology, the experience, and the solutions – you get it all with **Failsafe Controls**.
